PROJECTS

Music Streaming App

2025-09-12 - 2025-09-24

Create a music streaming app that lets users view, search, and stream music based on their preferences. The app should support personalized playlists, high-quality streaming, customizable playback settings, and user interactions, such as likes and comments.

Recipe App

2025-10-02 - 2025-10-16

Create a dynamic recipe application that allows users to browse, search, and filter recipes based on a variety of criteria, using data obtained from a public meals API. This project focuses implementing core React functionalities, ensuring a responsive user interface, and providing a smooth user experience

Kanban Board

2025-12-25 - 2026-01-11

Create a Kanban-style task management app with ReactJS that lets users create, organize, and move tasks between columns such as "To Do," "In Progress," and "Done." This project focuses on drag-and-drop interaction, state management using the Context API, and local persistence using localStorage.
